

BEAVER TAILS

BEAVER TAIL CRITERIA

Tails must be skinned open (split on the side) with both halves connected in the middle. Tails must have a width of 8 inches with no holes or scars. Only process tails with a width of at least 4 ½ inches width. This will allow for some shrinkage. Second quality tails or tails less than 8 inches will not be returned. They have no value.

IMPORTANT NOTICE

Beaver tail handling is intended for your information only. Please note that FHA had a beaver tail order at the time this manual was printed. Please contact us (by phone or e:mail) before shipping any beaver tails as orders are not on an ongoing basis and tails shipped will not be returned.

**Minimum 8 inches wide.
No holes or scars**
