| Painted Bunting | o | o | o | o

**Seasonal Codes**
- **Sp** = Spring: March – May
- **Su** = Summer: June – July
- **F** = Fall: August – November
- **W** = Winter: December – February

**Abundance Codes**
- **a** = abundant (numerous and widespread)
- **c** = common (certain to be seen/heard in suitable habitat)
- **u** = uncommon (present but not certain to be observed)
- **o** = occasional (observed only a few times during a season)
- **ca** = casual (observed only once every few years)
- **ac** = accidental (observed only once or twice total)
- *** = species known to breed within the park

LeFleur’s Bluff State Park
Rising over 100 feet above the floodplain, while oak, elm, ash and other trees form a mixed bottomland hardwood forest in much of the park. This diversity of habitats supports an exceptional array of bird life for an urban park. 211 species have been recorded here, with 75 of those known to breed within the park—including such noteworthy species as Wood Duck, Yellow-crowned Night-Heron, Magnificent Frigatebird, Mississippi Kite, Barred Owl, Acadian Flycatcher, and Prescribed communities include riverfront pioneer forest, shrub wetland, marsh, and the artificial grassland of the park’s golf course.

Birders from the novice to the expert will find much here after the breeding season. Please call the Park Manager at 601-987-3923 for current information.
