Summer Gyotaku Art Class

The Visitor Education Center at the Bob Tyler Fish Hatchery will host a Gyotaku art class:

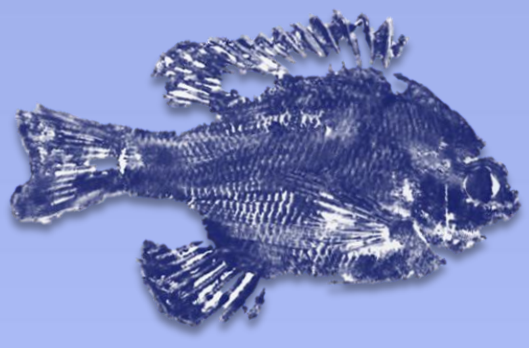

Saturday, June 20, 2026
12:00 a.m. - 4:00 p.m.

Gyotaku is the traditional Japanese method of printing fish.

Using rubber fish stamps and ink, youth ages 7 and older, will be able to create fish prints of native Mississippi species. Younger participants will create fish art from their handprints. **Participants should wear appropriate clothing for these activities.** After the program, staff will conduct a question-and-answer session at the VEC's 10,000-gallon aquarium.

The program is free with the price of admission. Admission is $2.50 for adults ages 18-59, and $2.00 for youth ages 3-17 and adults over the age of 60. **For additional information, or to pre-register for the event, call the VEC at (662) 563-8068.**

The VEC is part of the MDWFP's Bob Tyler Fish Hatchery and is located at Exit 233 east off I-55.
