50 YEARS of the MISSISSIPPI WATERFOWL STAMP

FIFTY STAMPS. FIFTY YEARS OF COMMITMENT. A CONTINUING LEGACY OF CONSERVATION LEADERSHIP.

Created in 1976, the Mississippi State Waterfowl Stamp has generated dedicated funding for wetland conservation, scientific research, and partnerships that protect critical habitat in Mississippi and on the northern breeding grounds.

This long-standing program has strengthened the foundation for waterfowl populations and hunters by improving habitat quality, expanding restoration work, and supporting the science that informs management decisions.

The conservation successes supported by the Mississippi Waterfowl Stamp are made possible through the shared commitment of our partners - here in Mississippi and across the continent.
